Reno Public Meeting
October 4, 2001

LARRY MEIDELL: M-e-i-d-e-l-l.

13 I'm in favor of the Yucca Mountain Repository
14 for nuclear waste. Nuclear energy is what heats this
15 plant today, the sun. Nuclear energy is going to be part
16 of our environment forever, as long as there is an earth.
17 There's risk in everything. There's greater
18 risks in driving our cars up and down the freeway,
19 there's a risk in these buildings, so there are all kinds
20 of risks, and I believe that one is sufficiently low to
21 warrant going to completion.
22 Thank you.
